Summary

Java Backend Developer with **3+ years** of experience developing enterprise backend applications using **Java, Spring Boot, Spring MVC, Hibernate, JPA, and SQL**. Skilled in designing **RESTful APIs**, implementing secure authentication with **Spring Security and JWT**, optimizing database performance, and building scalable backend solutions in Agile environments. Passionate about designing clean, maintainable, and high-performance backend systems.

Work Experience

LabVantage Solutions Pvt. Ltd.

Aug 2023 – Present

Associate Solution Engineer

- Developed and enhanced scalable backend applications using **Java, Spring Boot** and **Spring MVC** within enterprise **Healthcare System**.
- Implemented **RESTful APIs** using **Spring Boot**, with structured request validation, centralized **exception handling**, and comprehensive API documentation, improving system integration efficiency by **30%**.
- Implemented **JWT** and **OAuth 2.0**-based authentication and authorization, improving application security and access control.
- Built backend business logic and handled database operations using **Hibernate, JPA, JDBC, and SQL**, ensuring efficient data processing and performance optimization, reducing query execution time by **25%**.
- Wrote **unit tests** using **JUnit** and **Mockito** for critical business logic ensuring code reliability and minimizing production defects.
- Participated in **CI/CD pipeline** activities using **Maven** and **Git** for version control ensuring **stable** and **streamlined** release processes.

LabVantage Solutions Pvt. Ltd.

Jan 2023 – Jul 2023

Intern

- Completed intensive training in **Java, Spring Boot, SQL and REST API development** with hands-on enterprise **application development**.

Technical Skills

Backend & Languages: Java, OOPS, Spring Boot, Spring MVC, Spring Security, Hibernate, Microservices, REST APIs

Cloud & DevOps: AWS, Git, GitHub, SVN, CI/CD Pipelines

Databases: Microsoft SQL Server, PostgreSQL, MongoDB, MySQL

Testing & Tools: JUnit, Mockito, Postman, IntelliJ IDEA, JIRA, MS Office

Projects

Money Manager Application | *Java, Spring Boot, MySQL, REST API, Microservices, React JS* | [Link](#)

- Developed Spring Boot **RESTful APIs** for **user management, transaction tracking, category management** and **budget monitoring** with **JWT authentication**.
- Designed clean **layered architecture (Controller → Service → Repository)** ensuring separation of concerns and maintainable codebase.
- Implemented **budget limit validation** with real-time alerts preventing overspending and improving expense **tracking accuracy by 40%**

Healthcare Appointment Application | *Java, Spring Boot, MySQL, REST API, Microservices* | [Link](#)

- Built **RESTful APIs** for **doctor management, patient registration and appointment scheduling** with **JWT based role authentication** supporting **Patient, Doctor and Admin** roles using **Spring Security**.
- Designed dynamic slot generation logic with conflict prevention using DB unique constraints.
- Implemented **centralized exception handling** using **@RestControllerAdvice** with custom exceptions improving API error response consistency.
- Implemented automated **email reminders** using **Spring Scheduler** and **Spring Mail**.

Education

Asansol Engineering College, West Bengal

Bachelor of Technology in Computer Science and Engineering

2019 – 2023

CGPA: 9.01
